

Sightseeing Tour with Jewelry Ice in Toyokoro ~ Round trip from Sapporo ~

from Hotel in Sapporo City Central Area
to Toyokoro Seaside

Discover clusters of “Jewelry Ice”

The proper name for “Jewelry Ice” is actually Tokachi river ice. Although the mouth of the river freezes over in the winter, the ice breaks up and flows into the ocean. The ice then drifts in the surrounding seas and is beaten on the sand hills when the sea gets rough. As the ice is also swept by waves, the sharp edges are smoothed out like a pebble on a river bank.

Previously, visitors to see “Jewelry Ice” were people who wished to see the ice at the time of dawn of the orange sun, people who wished to see the blue ice in the day time, people who wish to take photos and people in search of the ideal “Jewelry Ice”. However, now, “Jewelry Ice” is gaining more and more attention from photographers and tourists both in Japan and from overseas.
