

# Why Alphard is Riding comfort

## <Big difference with HIACE Grand Cabin>

### ① Room Size

	Room length	Room width
Alphard	3,210mm 3 line seat layout	1,530mm 3 seat
HIACE Grand Cabin	3,525mm 4 line seat layout	1,695mm 3 seat + aisle

TOYOTA ALPHARD

Seat layout

Tractor for Luggage

### ② Seat Spec.

	Reclining angle	Seating space	Seat Quality
Alphard	90 degrees	Ave. 1,070mm	deluxe seat (Soft)
HIACE Grand Cabin	10 degrees	Ave. 705mm	Standard seat (Hard)

TOYOTA HIACE Grand Cabin

Seat layout

Aisle

Export model HIACE is layout free that's why most of HIACE equipped deluxe seat as a made of leather. However it look like same outside HIACE in Japan is quite difference with another Asian country. Because according japan traffic low should make aisle in a car room.(orange arrow in a above fig.) Consequence seat width is narrow , seat reclining is little , become uncomfortably. That's why Most of FIT tourist prefer "Luxury Alphard " instead of HIACE Please book and try to ride on Alphard !
